

This listing of the claims will replace all prior versions, and listings of claims in the application.

Listing of Claims

Claim 1 (Currently Amended) An electronic paging system comprising:

a receiver having a graphic display, and a user interface;

said receiver storing information on how said user interacts with said receiver;

a transmitter; and

a software programmer which uploads and downloads software to and from said transmitter and/or receiver using [remote access networks such as a] telecommunication [line] lines or a wireless network.

Claim 2 (Currently Amended) The system of claim 1 further comprising:

a charger, which uploads and downloads software to and from said software programmer using [remote access networks such as] telecommunication lines or a wireless network.

Claim 3 (Currently Amended) The system of claim 1 wherein said receiver [with a user interface] comprises modes of paging, advertising and interactive entertainment using two way communication with other receivers and devices.

Claim 4 (cancelled)

Claim 5 (cancelled)

Claim 6 (previously amended) The system of claim 1 wherein said interface comprises a keypad or touch panel display.

Claim 7 (previously amended) The system of claim 2 wherein said receiver can upload or download software and data to and from said charger.

Claim 8 (previously amended) The system of claim 2 wherein said receiver can upload or download software and data through conductive contacts.

Claim 9 (Currently Amended) [An electronic paging] The system of claim 1 wherein
[comprising:

a receiver having a display and a user interface;

a transmitter;

a software programmer which uploads and downloads software to and from said

transmitter or receiver;

a charger, which uploads and downloads software to and from said software programmer;

and]

said receiver can perform a wireless upload or download to said [charger,] transmitter[,]

and/or wireless service provider.

Claim 10 (Currently amended) The system of claim 2 [1] wherein said receiver can perform a wireless upload or download to said [transmitter and/or wireless service provider] charger.

Claim 11 (previously amended) An electronic paging system comprising:

a receiver having a display and a user interface;

a transmitter;

a software programmer which uploads and downloads software to and from said

transmitter or receiver; and

said transmitter informs said receiver of queue status including updated information as to where a user is in the queue.

Claim 12 (previously amended) The system of claim 1 wherein said transmitter tracks the last several pages that were made.

Claim 13 (previously amended) The system of claim 1 wherein said transmitter can upload or download software through hard media.

Claim 14 (cancelled)

Claim 15 (cancelled)

Claim 16 (cancelled)

Claim 17 (previously amended) The system of claim 1 wherein said transmitter stores information relating to interaction between said receiver and its users.

Claim 18 (previously amended) The system of claim 2 wherein a single charger can support many receivers at one time.

Claim 19 (previously amended) The system of claim 2 wherein said charger both charges and stores software.

Claim 20 (previously amended) The system of claim 2 wherein said charger stores information relating to interaction between the receiver and its users.

Claim 21 (previously amended) The system of claim 2 wherein said charger can upload or download software from said software programmer or other external systems through hard media.

Claim 22 (cancelled)

Claim 23 (previously amended) The system of claim 2 wherein said charger can upload or download software and data through a telecommunication line.

Claim 24 (previously amended) The system of claim 2 wherein said charger can upload software and data through a wireless service provider.

Claim 25 (New) The system of claim 11 further comprising:

a charger which uploads and downloads software to and from said software programmer using telecommunication lines or a wireless network.

Claim 26 (New) The system of claim 11 wherein said receiver comprises modes of paging, advertising and interactive entertainment using two way communication with other receivers and devices.

Claim 27 (New) The system of claim 11 wherein said transmitter comprises modes of communication with receivers and other devices.

Claim 28 (New) The system of claim 25 wherein said charger comprises modes of communication with receivers, transmitters and other devices.

Claim 29 (New) The system of claim 1 wherein said receiver is not stackable.

Claim 30 (New) The system of claim 1 wherein said receiver is battery operated.
